| Frequency of the Board Meetings |                                           | Twice yearly                                                                                   |

**(ii). Grievance Redressal mechanism for Faculty, Staff and Students:**

The institute has set up a Grievance Redressal Cell to look into the grievances of the students, faculty and staff. The Cell consists of five senior members of faculty, which very closely interacts with all the students, faculty and staff, and thus facilitates effective redressal of grievances of any kind. As the administration is highly transparent and the communication flows freely at a faster pace, hardly any grievance is felt on the campus.

**(iii). Establishment of Anti Ragging Committee:**

| S.No. | Position                                  | Name of the Member with Designation                                        | Email                              |

## E - Library facilities

The Library uses Koha software system (an open-source integrated library system, used world-wide) with RFID scanning facility, puts it on par with the best modern libraries in keeping track of issues and returns in a foolproof manner. The Library follows the open access systems encouraging the user to browse freely in the stack area. A modern digital library with 96 computers with high speed internet access is housed on the first floor. The users can access online journals and video course materials with the help of head phones. The students can access e-resources anywhere in the campus through the IP range earmarked for e-journal access.

### (xii.) National Digital Library (NDL) details

The institution provides seamless access to the National Digital Library of India (NDLI), enabling students and faculty to enhance their learning and research through a vast repository of digital resources. NDLI is accessible 24x7 via the campus internet and Wi-Fi network.

NDLI Registration Number: INTNNCG3VFNAR99

### (xiii. & xiv.) List of Major Equipments, Facilities and Experimental setup in each Laboratory / Workshop

| Name of the Laboratory                         | Major Equipments / Setup                                                                                                                                                                                                                                                                       |
|------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Agricultural Engineering</b>                |                                                                                                                                                                                                                                                                                                |
| Unit Operations Laboratory                     | Burr Mill Apparatus, Ball Mill Apparatus, Hammer Mill Apparatus, Centrifugal Separator, Cyclone Separator, Pin Mill Apparatus, Single Effect Evaporator Apparatus, Sieve Shaker Gyratory, Plate and Frame Filter Press                                                                         |
| Tractors and Farm Engines Laboratory           | Sectioning of DC Clutch Assembly, Sectioning of FT Steering Assembly, Sectioning of Hydraulic Top Housing With Parts Assembly, Sectioning of FT Engine Assembly, Sectioning of 4WD FT80 HP Tractor Assembly, Sectioning of FT Rear End with Transmission Assembly, Tractor, Power Tiller - VST |
| Post Harvest Technology Laboratory             | Porosity Apparatus, Coefficient of Friction, Angle of Repose, Tray Dryer, Paddy Parboiling Unit, Rotary Type Groundnut Decorticator, Cleaner Cum Grader, Solvent Extraction Unit (Soxhlet Apparatus), Cone Polisher, Rubber Roll Sheller, Hot Air Oven                                         |
| Food and Dairy Engineering Laboratory          | Steam Distillation Apparatus, Milk Homogenizer, Microwave Oven, Autoclave, Lactometer, Buylometer, Centrifuge, Cream Separator, Freezer                                                                                                                                                        |
| Soil Science Laboratory                        | Digital PH Meter, Digital Conductivity Meter, Khan Shaker, Core Sampler With Hammer, Permeameter, Proctor Compaction Test Apparatus, Direct Shear and Vane Shear Test Apparatus, Pycnometer, Casagrande Apparatus                                                                              |
| Irrigation and Drainage Engineering Laboratory | Irrrometer (15cm, 30 cm, 45 cm), Blade Type Soil Sampling Tool, Soil Permeability Apparatus, Soil Core Sampler with SS Rings and Accessories, SSAT Vacuum pump, Micro irrigation system                                                                                                        |

**(xvii). Compliance of the Academic Bank of Credit (ABC), applicable to PGCM / PGDM Institutions and University Departments:**

Not applicable for PGCM / PGDM programmes

**(xviii). Short video (1-2 min) of Infrastructure and facilities available w.r.t. the courses in the website**

[https://drive.google.com/file/d/1odb8S1fJz1XKSj-a28e\\_oGswUsKAh4zS/edit](https://drive.google.com/file/d/1odb8S1fJz1XKSj-a28e_oGswUsKAh4zS/edit)

**(xix). Games and Sports Facilities**

The institution provides comprehensive sports and recreational facilities to promote the physical fitness and overall well-being of students. A total playing area of 764,074 sq. ft. has been developed with well-maintained infrastructure for both outdoor and indoor sports activities. The outdoor sports facilities include a standard 400 m athletic track with a football field, two Kho-Kho courts, one cricket field with cricket pitch, net practice facility, and portable net, one hockey field, two volleyball courts, two ball badminton courts, two Kabaddi courts, and one handball court. The sports complex also houses one basketball court, two synthetic tennis courts providing students with access to emerging sports. Indoor sports facilities include two table tennis tables, one snooker table, four carrom boards, and five chess boards. Separate gymnasiums for men and women are available with modern fitness equipment to encourage regular physical exercise.

The Boys' Hostel is equipped with ten semi-indoor badminton courts, an outdoor gym, and a dedicated yoga centre, providing ample opportunities for fitness and recreational activities within the hostel premises. The Girls' Hostel features four semi-indoor badminton courts, one basketball court, one hockey field, one throwball court, one volleyball court, and an outdoor gym, ensuring excellent sports infrastructure for women students.

One indoor wooden badminton complex with four courts is available to encourage regular practice. These facilities are extensively utilized by students for regular practice, intramural competitions, intercollegiate tournaments, and coaching programmes, fostering a healthy sporting culture and encouraging active participation in both recreational and competitive sports.

**(xx). Teaching Learning Process**

The focus of experiential learning at Bannari Amman Institute of Technology is on laboratory-based courses, which are supported by Layer-Learning, internships, skill development, and project work. Experiential learning approaches are used in between thirty and thirty-five percent of the courses on average. In contrast, Participative Learning encourages students to actively engage with the newest technology by emphasizing skill development through training, active engagement in labs, industry projects, internships, project contests, and project work. Participatory learning is incorporated into the design of

about 25-30% of courses. Approximately 75% of courses focus on problem-solving techniques, which are included into tutorial sessions and assignments. These methods use layer learning, group learning, and self-learning to help students develop higher-order cognitive abilities.

Animated videos, simulations, real-time examples, presentations, and activity-based experiments are just a few of the elements used in BIT's teaching-learning process to improve comprehension. Additionally, students can easily access course materials and contents on the institute's PS Portal at <https://ps.bitsathy.ac.in>.
